## 2 INTRODUCTION

### 2.1 Background

The subject of this report is an evaluation of the NNNG Conference 2008.

### 2.2 Aims

The aim of the study day was to raise awareness of various aspects of patient care in relation to nutrition.

## 3 DATA COLLECTION

The data evaluation forms were completed by study day participants and these were sent to the Clinical Audit & Effectiveness Department.

Percentages have been rounded to the nearest integer, which can result in the total appearing not to be 100% in some circumstances.

The key used in the results is that 5 is the highest rating, 1 being the lowest.
